### **Operating Instructions**

Thank you for purchasing an HPF-Pre Series 3 from HPF Technology LLC! Please take a moment to read these brief instructions. More information can be found at the HPF Technology website.

#### **Battery Operation**

Connect a standard 9-V alkaline battery as shown in the picture. It sits on top of a foam cushion that keeps it from vibrating. The lid has a similar cushion, and can be oriented in either direction. Secure the lid with the 4 screws (#6-32 x 1/2" flat head) furnished with the unit. Don't tighten the screws too hard, or you might strip the threads. They go in more easily if you "start" all of them before tightening any of them.

#### **External Power Operation**

Optionally, the preamp can operate on external power from a UL Listed wall mounted power supply. The connector has a 2.1 mm tip, and the tip is the negative terminal. This is the standard for guitar effects pedals. The preamp requires 9 Volts DC, at 10 mA. I have tested the preamp with a Visual Sound 1Spot adapter, which has a nice long cable and is oriented to take up just one space in a power strip.

Plugging in the external power supply bypasses the internal battery. If you don't need battery power, you can leave the battery out.

#### **Limited Warranty**

The HPF-Pre Series 3 ("Product") is warranted to the original consumer purchaser to be free of defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If the Product fails to function properly due to defects in materials or workmanship during the applicable warranty period, HPF Technology LLC, at its option, will repair or replace the Product, with no charge for labor or materials. This warranty applies only if the Product is sold and delivered within the U.S. All sales are FOB Madison Wisconsin, USA.
