

HPF-Pre Series 2M

HPF Technology LLC

Operating Instructions

Thank you for purchasing an HPF-Pre Series 2M from HPF Technology LLC! Please take a moment to read these brief instructions. More information can be found at the HPF Technology website.

Battery Operation

Connect a standard 9-V alkaline battery as shown in the picture. It sits on top of a foam cushion that keeps it from vibrating. The lid has a similar cushion, and can be oriented in either direction. Secure the lid with the 4 screws (#6-32 x 1/2" flat head) furnished with the unit. Don't tighten the screws too hard, or you might strip the threads. They go in more easily if you "start" all of them before tightening any of them.

The battery indicator LED

The LED is designed to produce a very brief flash of red light, just when a plug is inserted into the Output jack, if the battery is OK. If you didn't see it light up, pull out the plug, wait a few seconds, and try again.

The phase switch

During shipping, the phase switch can get vibrated into a "middle" position, where the preamp produces no sound. Please make sure it's in a definite position before trying the preamp.

Limited Warranty

The HPF-Pre Series 2M ("Product") is warranted to the original consumer purchaser to be free of defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If the Product fails to function properly due to defects in materials or workmanship during the applicable warranty period, HPF Technology LLC, at its option, will repair or replace the Product, with no charge for labor or materials. This warranty applies only if the Product is sold and delivered within the U.S. All sales are FOB Madison Wisconsin, USA.
